Mohammad Sadegh Aslanpour

Sex Male | Date of birth 11/02/1988 | Nationality Iranian

Education

2013-2016 **Masters of Computer Engineering - Software**, Islamic Azad University, Tehran Science and Research (Sirjan) Branch, Iran

GPA 17.40 out of 20

Related Courses: Distributed Systems, Parallel Algorithms, Advanced Computer Networks, Advanced OS, Advanced Software Engineering, Advanced Computer Architecture, Advanced Database

2010-2012 **Disarticulated Bachelor of Computer Software Technology Engineering**, Andisheh Jahrom Higher Education Institute, Jahrom, Iran

GPA 17.43 out of 20

2008-2010 **Articulated Associate of Computer-Software**, Estahban Technical University-Imam Hossein, Estahban, Iran

GPA 15.76 out of 20

Master's Thesis

Title *Improve resource allocation to application service providers in cloud with regard to Service Level Agreement*

Description This thesis proposed a resource allocation mechanism for web applications in cloud, which uses Radial Basis Function (RBF) neural network to make providence and flexible scaling decisions.

Research Interests

- Cloud Computing
- Autonomic Computing
- Software Engineering
- Optimization
- Fog and Edge Computing

Professional Experience

Oct. 2018–present **Member,** *Young Researchers and Elite Club, Islamic Azad University,* www.bpj.ir

May 2018–present **Editorial Board Member**, *Information Engineering and Applied Computing- from May 2018, International Journal of Autonomic Computing (IJAC)-from Nov. 2018*

Apr. 2017–present **External Reviewer**: JNCA, SUPE, IJHPCN, IJISTA , and IJSAMI. see my Publons profile

Jan. 2017–present **Adjunct Lecturer**, Islamic Azad University, Jahrom Branch, Jahrom, Iran
Taught courses: Software Engineering, Systems Design and Analysis

Feb. 2014–present **Member**, *Open Community of Cloud Computing* (OCCC) http://www.occc.ir/

Mar. 2012–present **Software Engineer**, *Jahrom Municipality (Public NGO)*, Jahrom, Iran

Personal skills

Mother tongue **Persian**

Foreign Language **IELTS 6.5** equivalent to B2 Level in CEFR

Speaking 6.5 Reading 6.0 Listening 6.5 Writing 6.0

Communication skills: team spirit gained through collaboration with researchers, professors, and lecturers from other countries because of working on shared research projects.

Organizational skills: good organization skills through working more than 6 years at municipality as an official employee

Job-related skills: mentoring skills - as a lecturer at university and software engineer (at municipality) - talented in training new software engineers.

Computer Skills

ADVANCED: Java, CloudSim, Network+, UML, Microsoft Office
INTERMEDIATE: OpenStack, VMWare, Latex, Apache, HAProxy, MYSQL, C#
BASIC: GitHub, Visual Basic, Pascal, C++, ASP.NET, R

Interests

-Travelling -Soccer -Swimming
-Chess -Bodybuilding -Backgammon

Projects

Auto-scaling-in-Openstack Auto-scaling of the Web applications in cloud using OpenStack is realized with this project which uses Mediawiki as its application. This project was carried out in DisNet lab at Monash University. Auto-scaling-in-OpenStack in GitHub

AutoScaleSim This project was to provide a toolkit for the simulation of a cloud environment, especially for auto-scaling of Web application. By this simulator, researchers, who are working on Elasticity feature of cloud computing, are able to simply implement and evaluate their own policies for auto-scaling of Web applications in a reliable and more importantly repeatable test environment as well as resource provisioning, machine-learning analysis, workload prediction solutions. AutoScaleSim in GitHub

Snoopy Protocols In this project, the *Snoopy Protocols* was simulated in C# language. *Snooping protocol* ensures memory cache coherency in symmetric multiprocessing (SMP) systems. *Snooping protocol* is also known as bus-snooping protocol.

Online Web Store In this project, as my Bachelor's project, an online Web store was designed and implemented in ASP.NET in C# language. AJAX's features have exciting performance in the designed web pages' components.
